PROFESSIONAL SUMMARY

Dynamic full stack web developer with expertise in the MERN stack, encompassing Node.js, Express.js, React.js, and MongoDB. Adept at using Generative AI to innovate and enhance software solutions. Strong problem-solving abilities, paired with rapid adaptation to new technologies and seamless team collaboration.

WORK EXPERIENCE

Minzor Pvt. Ltd.
WordPress Developer
July 2023 - October 2023

Job responsibilities:

- Customized themes and templates using WordPress to enhance user engagement and meet client specifications.
- Implemented responsive design principles to ensure the compatibility of websites across various devices and platforms.

PROJECTS

1. ShopX | 🌐 | 🛒

React | JavaScript

- Developed an e-commerce website using React, emphasizing dynamic product display for a seamless user experience.
- Implemented API data fetching to populate product data, ensuring a modern and responsive UI.

2. Unimart | 🌐 | 🛒

JavaScript | HTML5 | CSS3 | Git

- Collaborated on an e-commerce platform with features like category browsing and cart management using local storage.
- Utilized HTML, CSS, and JavaScript to develop product description pages, highlighting user-friendly and responsive design.

3. Foods Point | 🌐 | 🛒

React | HTML5 | Responsive Web Design | JavaScript

- Integrated a QR code scanner for efficient identification of food items, providing detailed nutritional information to users.
- Supported the development of a calorie calculator, enabling dynamic nutritional content calculation based on food quantity.
